## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on Nov 13, 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

### DETAILED ACTION

1. The amendment filed November 13, 2002 has been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s). It is further noted that the clean version(s) is (are) considered to be the Official version(s).

### *Drawings*

2. The proposed drawing correction filed on November 13, 2002 (paper no. 7) has been **disapproved** because a marked-up copy showing the proposed changes in red ink or otherwise highlighted was not provided (it is noted that this is necessary so that the PTO Draftsman, who reviews only the drawings, can readily review the changes). A response to this Office action must include a marked-up copy of the proposed drawing change. See MPEP § 608.02(v).

3. The corrected or substitute drawings filed on November 13, 2002 (paper no. 7) have been received and placed in the file.

*Abstract*

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. The abstract of the disclosure is objected to because it is too long. ✓ Appropriate correction is required. See MPEP § 608.01(b).

*Specification*

6. The disclosure is objected to because of the following informalities:

On page 18, line 21, ✓ "83" appears to be inaccurate, and it seems that it should be changed to --85--.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu et al., pn 5,437,828.

Shimizu discloses an apparatus with almost every structural limitation of the claimed invention but lacks a compressed air source connected to the solenoid valve. However, the Examiner takes Official notice that it is old and well known in the art to provide a compressed air source for a solenoid valve for various well known benefits including facilitating the operation of the solenoid. Therefore, it would have been obvious to one having ordinary skill in the art to provide a compressed air source connected to the solenoid valve of Shimizu for the well known benefits including that described above.

***Response to Arguments***

9. Applicant's arguments filed November 13, 2002 have been fully considered but they are not persuasive.

In the third paragraph on page 5 of the amendment, applicant argues that

Art Unit: 3724

“The Shimizu et al. patent does not disclose the method of controlling the distance between punched out segments of the film or web by using a computer that calculates the timing of hole punching actuation based on based on information received from an optical encoder that measures the rotation of a roller.”

It is respectfully submitted that applicant's argument is not understood, particularly since a method is not being claimed. Rather, the claims are directed to an apparatus, and it is the Examiner's position that the prior art teaches and/or suggests all of the structure of the claimed invention. Additionally, applicant argues that the present invention operates differently from the prior art. However, it is emphasized that the Examiner's position is not that the prior art operates in the same manner as the present invention, but rather that the prior art teaches and/or fairly suggests all of the structure of the claimed invention.

### ***Conclusion***

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3724

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404. The examiner's typical work schedule is Tuesday through Friday, and he can be reached during normal business hours on these days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Allan Shoap, can be reached at (703)308-1082.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-1148. The fax numbers for this group are: formal papers - (703)305-3590; informal/draft papers - (703)305-9835.
